

Manfredi & Associates, Inc.

30 Years of Shipment, Exports, Imports and Consumption Data Now Available

Manfredi & Associates has been publishing market data and forecasts in our December issue of Machinery Outlook newsletter for 30 years. Readers receive 5 or 6 years of historic data and a one year forecast. Most product categories include three or four size classes. If a reader pieces together the data from all the issues he would have a pretty good database of U.S. machinery markets. Now for the first time the data is available in a convenient form. Purchasing the data will save readers time and money. They will also receive all the changes and corrections we've made over the year as more accurate data has become available.

1981 to 2013 Shipment, Exports, Imports and Consumption data for 13 types of Construction Equipment. 3 or 4 size classes for most products.

- Asphalt Pavers
- Compactors–Vibrating and Static
- Cranes
